

What is auto detailing?

Auto Detailing

Auto detailing is the art of restoring a vehicle to its factory condition. Auto detailing is a long-process that involves cleaning and reconditioning of both interior and exterior of the car. The aim of this is to restore the paintwork by removing paint defects such as scratches, swirl marks, oxidations etc to make the car look brand new. Many wrongly understood that auto detailing is all about ceramic coating. In fact, ceramic coating is just an option in the protection stage of the vehicle detailing process.

3S Detailing Process

The auto detailing process includes various steps, these detailing steps can be grouped into 3 steps :-

DECONTAMINATION (wash & clean),
RESTORATION (correction & polish),
PROTECTION (wax, nano ceramic coatings & PPF).

This categorisation helps you to group the detailing steps without confusing and miss any of the steps in auto detailing process. The order of the detailing steps needs to be followed to avoid any confusion and possible misses.

Step 01: D E C O N (Wash & Clean)

Car washing & cleaning is the first step of your car detailing, which helps you to decontaminate your car from any dirt, stains and other surface pollutants like brake dust, industrial fallout, acid rain deposits and rail dust etc which can damage your car surface.

A daily-driven car is exposed to the elements, air-borne nasties are landing on your car; fallout, overspray, iron (ferrous) metal, bugs, tar, road film, tree sap and others, bonding to the paintwork and leaving it looking dull and feeling like sand paper. These nasties are called as contaminants and the process of this occurring as contamination.

WHEELS & TIRES: The wheels & tire cleaning also includes decontamination of brake dust, iron deposit & tar using specific cleaners like IRON FALLOUT and TAR REMOVER which are body safe and not only cleans but also restores the lost look. This process ensures your ride's wheels are free from any iron contamination and brake-dust, presence of which otherwise can corrode and damage the alloy wheels.

SALT & MINERAL DEPOSIT REMOVAL, LOGO CLEANING: All the dirt, salt and mineral deposits are removed from the body, especially from the logo using special body safe chemicals & special brushes.

CAR WASH: The body is thoroughly washed using PH-neutral shampoo that's safe on paints and coating, and will be dried using the waffle weave towel which will ensure no further streaks are induced on the paint surface.

TAR DECONTAMINATION: Vehicles usually collect large amounts of tar and asphalt contamination during daily use, these tar spots will be removed using TAR REMOVER.

CLAYING: After washing the car thoroughly to get rid of the surface contaminants, it will be later clayed to remove any further contaminants that are bonded with the paint and were not able to get removed by washing. After this process, your ride will be completely free from any contaminants & dirt.

Step 02: R E S T O R E (Polish & Correction)

The paint defects can be removed by polishing the paint surface using right compounds and pads on a DualAction (DA) polishing machine or a rotary polisher.

We use Rupes compounds, polishes and pads which are manufactured in Italy to correct the paint surface. We use DA course High performance cut with DA course wool pad to remove orange peel and deep scratches. To remove Severe scratches, swirls we use DA Fine high performance fine polish along with DA fine high Performance fine polishing foam pad on a DA polisher which will bring mirror finish for the paint surface.

Unlike our competitions, the excellent combination of our compounds and pads enable us to use two-step correction in most of the situations and save a lot of clear coat on our customers cars.

Step 03: P R O T E C T (Wax & Nano ceramic coating)

The car surface should be sealed after the correction stage from any further abuse. Every surface of the car can be protected using special products.

PREPPING: After multiple steps of polishing are performed, it calls for a need of surgical-clean of the paint surface before any kind of protection is performed. The body will be wiped down with IPA (Isopropyl alcohol) for proper vehicle preparation before any protection application to the paint surface.

This serves two purposes, it degreases the paint surface and removes the polish residue and the oil presented in the polishes, it also gives anti-static property, so the dust particles won't settle on the surface and makes the surface oil-free and dust-free for a perfect coating. This process is very important as a coating requires a clean and bare paint surface to do a perfect chemical bonding.

PAINT PROTECTION: After Prepping the paint would be protected with the ceramic coating and wiped using suede microfiber cloth. Multiple layers will be added based on the chosen package.

TYRE The cleaned tires are dressed with water-based dresser which restores the shine and safeguards the rubber from cracking, which can last 2-3 months as an add-on service if you want more durability and protection for the tires.

Maintenance & Endure

Car maintenance is also equally important and we emphasize this post-detailing process as a part of the car detailing process itself. Proper maintenance improves the durability of the protection. Maintenance includes proper washing and cleaning with suggested products and process. There are wash&protect car shampoos which can wash and protect your car motorcycle in single-step. Applying silica-based maintenance spray for ceramic coatings prolongs the durability and enhances both gloss and repellency. Regular use allows to gain up to 90% of the regular durability of hydrophobic properties.

Exterior valet services

Premium Wash Package (single stage foam wash)

- High pressure water rinsing
- Complete exterior foam wash
- Underbody cleaning
- Tyres cleaning and dressing
- Alloy wheels cleaning
- Wheel arches water rinsing
- Door Frame wiping
- Window Glasses cleaning
- Exterior plastic dressing
- Drying with high quality microfiber towel and air blower

| | | |
|---|-------------------------|-------|
|  | Mini | 400/- |
|  | Mid Sedan / Compact Suv | 450/- |
|  | Large Sedan / Large Suv | 500/- |
|  | Sports Cars | 600/- |

Luxury Wash Package (2stage foam wash)

- Services included in premium package
- Pre-wash with touchless shampoo (removes 90-95% road dirt, gnats without mechanical action)
- Light Tar and bug removal
- Window glass lip cleaning
- Wheel arches cleaning (brushing with solution)
- Monograms Cleaning (rust and mineral deposit cleaning (if applicable))
- Engine water rinsing and dressing
- Wiper fluid topup
- Wiper blades cleaning
- Grills and panel gaps brushing
- Door shuts cleaning and degreasing
- Exterior Black trim scrubbing and dressing
- Finishing with Detailer spray

| | | |
|---|-------------------------|--------|
|  | Mini | 800/- |
|  | Mid Sedan / Compact Suv | 850/- |
|  | Large Sedan / Large Suv | 900/- |
|  | Sports Cars | 1000/- |

Classic Wash Package

- Services included in luxury package
- Complete car claying
- Finishing with high quality ceramic wax

| | | |
|---|-------------------------|--------|
|  | Mini | 2200/- |
|  | Mid Sedan / Compact Suv | 2300/- |
|  | Large Sedan / Large Suv | 2400/- |
|  | Sports Cars | 2500/- |

Interior valet services

Premium Package

- Carpet vacuuming
- Seats vacuuming
- Dashboard micro vacuuming
- Doors micro vacuuming
- Boot vacuuming
- Complete interior wipe with APC solution
- Glass cleaning
- Accelerator,brake or clutch paddel cleaning
- Interior dressing
- Floor Mats vacuuming and Cleaning

| | | |
|---|-------------------------|-------|
|  | Mini | 300/- |
|  | Mid Sedan / Compact Suv | 350/- |
|  | Large Sedan / Large Suv | 400/- |

Luxury Package

- Services included in Premium package
- Plastic mats cleaning and dressing
- Dashboard cleaning
- Centre console cleaning
- Front doors cleaning
- Ac vents dusting
- Complete interior cleaning

| | | |
|---|-------------------------|-------|
|  | Mini | 600/- |
|  | Mid Sedan / Compact Suv | 650/- |
|  | Large Sedan / Large Suv | 700/- |

Classic Package

- Services included in luxury package
- All doors cleaning and dressing
- Seats deep cleaning
- Ac vents foam cleaning

| | | |
|---|-------------------------|--------|
|  | Mini | 1600/- |
|  | Mid Sedan / Compact Suv | 1800/- |
|  | Large Sedan / Large Suv | 2000/- |

Complete interior valet(Deep Cleaning)

- Complete interior micro vacuuming
- Ac vents foam cleaning
- Headlining cleaning
- Dashboard cleaning
- Doors cleaning
- Seats remove and deep Cleaning
- Seat belt cleaning
- All plastic surfaces cleaning
- Carpet wet cleaning
- Fabric mats high pressure washing
- Plastic Mats Cleaning and dressing
- Boot cleaning
- Spare tyre cleaning (if tyre is placed in boot space)

| | | |
|---|-------------------------|--------|
|  | Mini | 3200/- |
|  | Mid Sedan / Compact Suv | 3500/- |
|  | Large Sedan / Large Suv | 4000/- |

Paint Correction

Basic (Single Stage Polishing)

- Premium exterior wash
- Paint chemically Decontamination
- Claying to remove all foreign contaminants such as Road tar, tree sap, road films, industrial fallout
- Door shuts deep cleaning
- Single stage paint enhancing polish to remove Light swirls marks and scratches
- Premium grade wax applying
- Wheel wax applying
- Plastic trim restoration
- Engine degreasing

| | | |
|---|-------------------------|--------|
|  | Mini | 4000/- |
|  | Mid Sedan / Compact Suv | 5000/- |
|  | Large Sedan / Large Suv | 6600/- |

Major (Dual Stage Polishing)

- Luxury exterior wash
- Mineral deposit remove from the panel gaps grills, chrome, etc
- Paint chemically Decontamination
- Claying to remove all foreign contaminants such as Road tar, tree sap, road films, industrial fallout
- Door shuts cleaning
- Dual stage polishing to remove Heavy swirl marks, marring, etching and moderate scratches
- Ceramic wax applying
- Plastic trim restoration
- Engine degreasing

| | | |
|---|-------------------------|--------|
|  | Mini | 7000/- |
|  | Mid Sedan / Compact Suv | 8000/- |
|  | Large Sedan / Large Suv | 9000/- |

Detail (Triple Stage Polishing)

- Services included in major correction
- Mineral deposit remove from the panel gaps grills, chrome, etc
- Deeper scratches and defects wet sanded to remove (If possible)
- Followed 3 stage polishing process
- 6 month coating applying

| | | |
|---|-------------------------|---------|
|  | Mini | 9000/- |
|  | Mid Sedan / Compact Suv | 10000/- |
|  | Large Sedan / Large Suv | 12000/- |

Paint Protection Coatings

Ceramic and Graphene coatings

Advanced coatings derived with nano-technology that help prevent environmental damages on your car's precious paint. These coatings form a 9H or 10H hard crystallised layer on top of your vehicle's clear coat and provide resistance against light scratches, chemical / acids and also protects the paint against harmful UV rays. You will also experience hydrophobic properties with the application of these coatings, which would avoid water markings to a great extent. These coatings are available with 1 2 3 and 5 year application warranty plans. Choose from a range of Body, Wheel, Glasses and Plastic trim coatings here at Ovosh 3S detailing

| Application warranty plans | | 1 year | 2 year | 3 year | 5 year |
|--|-------------------------|---------|---------|--------------|---------|
|  | Mini | 15000/- | 19000/- | 23000/- | 30000/- |
|  | Mid Sedan / Compact Suv | 18000/- | 22000/- | 26000/- | 32000/- |
|  | Large Sedan / Large Suv | 21000/- | 25000/- | 29000/- | 35000/- |
| Glass | | | | Alloy | |
| | Front glass any car | 2000/- | | 12"-14" | 6000/- |
|  | Mini | 4000/- | | 15"-17" | 8000/- |
|  | Mid Sedan / Compact Suv | 4500/- | | 18"-20" | 10000/- |
|  | Large Sedan / Large Suv | 5000/- | | 21"-24" | 12000/- |

Note:

- The life of coatings totally depend on the usage and handling of the vehicle.
- No coating is scratch-proof and daily care is utmost necessary for the best appearance of your vehicle.
- Ceramic coatings are built to resist light damages. To get the best life out of a ceramic coat, use clean microfibres and less TDS water for daily wiping and washing needs.
- An annual maintenance is necessary for ceramic coated cars. This service is payable and helps get rid of damages and contaminants as much as possible.
- Maintenance charges may change as per inflation and fluctuation in material pricing and its periodicity depends purely on usage and daily care from the customer's end.
- Discolouration, Patchiness and Cracking of coating is covered under application warranty. Ceramic coating's warranty is not applicable on 3rd party painted panels and ownership transfer.
